Profile Summary

- Driven Senior Software Developer with 7+ years of experience in designing and delivering high-quality mobile applications across Android and cross-platform frameworks.
- Strong expertise in building scalable, performant, and user-centric applications using modern technologies such as Kotlin, Java, and frameworks like Flutter and React Native.
- Resourceful in managing projects from conceptualization, visualization to technology mapping** and final execution of projects
- Proficient in end-to-end mobile development lifecycle**—from requirement analysis, architecture design, development, testing, deployment, to post-release maintenance.
- Hands-on experience with Agile methodologies** including Scrum and Kanban, actively contributing to sprint planning, backlog grooming, and continuous delivery practices.
- Skilled in designing clean, maintainable architectures (MVVM, Clean Architecture) and implementing best coding practices to ensure high-quality and reusable code.**
- Expert in implementing process and encouraging workers and leadership to **embrace the Agile Process, Principles & Practices**
- Expertise in integrating RESTful APIs, third-party SDKs, and cloud services (Firebase, AWS) to build feature-rich and connected mobile applications.
- Excellence in managing end-to-end delivery, project planning & implementation** from scope management, to activity sequencing, effort & cost estimation, risk analysis to quality management in line with the guidelines & norms
- Strong experience in performance optimization, debugging, and resolving complex issues to ensure smooth app functionality and improved user experience.**
- Adept at implementing modern UI/UX practices using Jetpack Compose (Android) and cross-platform UI frameworks to deliver intuitive and responsive designs.**
- Experienced in CI/CD pipelines, version control (Git), and automated testing to ensure efficient and reliable release cycles.
- Exposure to Play Store/App Store deployment processes, app security best practices, and compliance standards.

Career Timeline

Clients: UAEIAA, H&M(Singapore), Lovpipo, **Every Nation Church (Singapore)** etc.

Soft Skills

Certifications

J2EE (PMP)[®] from Ducat Institute

Android Developer from Cosmo Info Solution.

Hardware & networking from Jet king institute

Acterys certification for PowerBi

Personal Details

Date of Birth	1 st January 1991
Gender	Male
Marital Status	Married
Nationality	Indian
Languages Known	English, Hindi
Hobbies	Cricket, Badminton

OTHER SKILLS

Power BIPower AutomateAzureGitHub

- Integrated AI-powered features into Android and cross-platform mobile applications using REST APIs and SDKs.
- Experience with Google ML Kit for OCR, barcode scanning, face detection, image labelling, and text recognition.
- Worked with on-device machine learning using TensorFlow Lite for offline inference and optimized model performance for mobile devices.
- Familiar with Google Gemini API and OpenAI APIs for chatbot, content generation, summarization, smart search, and recommendation features.
- Implemented AI-based chat interfaces with prompt handling, streaming responses, conversation history, and error handling.
- Knowledge of integrating image generation, speech-to-text, text-to-speech, and document-processing features in mobile applications.
- Understanding of responsible AI practices, including user consent, data privacy, content moderation, and safe handling of user-generated data.
- Familiar with AI-assisted development tools such as GitHub Copilot and ChatGPT for code review, debugging, documentation, and productivity.

Dec'23 – Present| Intelloger Technologies Pvt. Ltd. | Sr. Software Developer

Key Result Areas:

- Developing and maintaining high-performance mobile applications using Android Studio, Flutter, and React Native for Android and cross-platform environments
- Designing scalable, reusable, and maintainable mobile application architectures following MVVM, Clean Architecture, and modular development practices
- Implementing responsive UI/UX designs with optimized performance, smooth animations, and adaptive layouts across multiple screen sizes and Android versions
- Implementation of Agile in projects for various large accounts, Scrum values, principles and actively applying the same in the project prior to delivery
- Managing large & complex projects or multiple components of a large project involving more than one company's product
- Integrating REST APIs, third-party SDKs, Firebase services, payment gateways, push notifications, and real-time data synchronization within mobile applications
- Managing complete mobile application lifecycle including requirement analysis, development, testing, deployment, release management, and post-production support
- Collaborating with cross-functional teams including designers, backend developers, QA teams, and business stakeholders for successful project delivery
- Handling state management using Redux, MobX, Provider, Bloc, ViewModel, and Jetpack components for scalable application development
- Implementing Agile and Scrum methodologies while participating in sprint planning, daily stand-ups, code reviews, and retrospective meetings
- Working with modern Android technologies including Jetpack Compose, Kotlin Coroutines, Room Database, Hilt/Dagger, WorkManager, and Android SDK components
- Contributing to continuous improvement by identifying process enhancements, adopting new mobile technologies, and implementing industry best practices for application development
- Collaborating with agile teams, scrum masters, agile product owners, leaders, and stakeholders to develop their depth of understanding of agile principles & Kanban Board
- Interfacing with clients to gather business requirements, analyze technical feasibility, and provide effective mobile solutions aligned with business objectives
- Directing & delivering large-scale software projects on time and on budget by effectively collaborating, facilitating, leading and coaching multiple Scrum Teams
- Contributing to continuous improvement by identifying process enhancements, adopting new mobile technologies, and implementing industry best practices for application development

Previous Experience

Feb'22 – Feb'23| Singsys Pte. Ltd | Sr. Software Developer

A leading software development and technology solutions provider

- Led development projects including H&M, Tourigo, Lovpipo and more
- Utilized agile methodologies to manage and execute project workflows

Feb'21 – Aug'21| Ostron Electronic Pvt. Ltd. | Android Developer

Manufactures and develops electronic devices and solutions

- Contributed to projects such as Libra Pay, Greenfield School, Vasu Infra, JustBue (Ecommerce) and many more
- Enhanced existing applications with new features and functionalities

Jun'18 – Jan'21| JSM Infotech Pvt. Ltd. | Android Developer

A technology company specializing in software and application development

- Worked on various projects including Payment2All, FasterRecharge, Atmultiservice, Checkon, Nubiotech, AGXL and many more
- Developed user-friendly mobile applications using Kotlin
